SUMMARY

I am a high school graduate with a major in social sciences who has a great interest in programming. I possess solid skills and knowledge in web development. I am ready to contribute as a Junior Web Developer with my ability to develop efficient and high-quality web applications.

Skill Highlights:

HTML – CSS – Javascript – NodeJs – ExpressJs – Rest API PostgreSQL – ReactJs – Redux – Bootstrap – GIT

EDUCATION

SMA Swasta Budi Mulia Tumba Jae

Juny 2019 – April 2022

EXPERIENCE

Frontend Developer Intern
FYP Media

February - May 2024

- Collaborated with the backend team for API integration
- Scliced website designs into functional components using React and Bootstrap.
- Developed frontend features based on provided designs.
- Debbuged and resolved issues in frontend components.

PORTOFOLIO

DefectDetect

Created a bug management website called DefectDetect using ExpressJS, PostgreSQL, JWT, ReactJS, Redux, and Bootstrap. DefectDetect has two roles: QA and Developer. QA can view and create bugs but cannot change their status. Developers can view and change the status of bugs.

Laundry Website

Make website laundry app using react js, react-bootstrap, and redux. Laundry App to help employee to manage transaction and manage list product or service they have.

CRUD Product

Developed a website CRUD product feature using PostgreSQL, ExpressJS, ReactJS, Node.js, and Bootstrap. This feature enables users to create, read, update, and delete products within the application, providing a seamless way to manage product information. Bootstrap was used to ensure a responsive and visually appealing design.
